Behind the Sound

Acoustera specializes in designing and manufacturing high-performance PET Felt acoustic solutions that enhance both sound quality and interior aesthetics.

As a pioneer of acoustic solution producer in Türkiye with 18 years of expertise in 2026, exporting globally, Acoustera combines innovative design with sustainable materials to create high quality products that meet the evolving needs of modern spaces.

Driven by continuous innovation and customer-centric thinking, we collaborate closely with architects, designers, and partners to bring creative visions to life. With a focus on quality, functionality, and design versatility, our products seamlessly integrate into contemporary architecture while contributing to healthier indoor environments.

At Acoustera we are committed to shaping spaces that are not only visually inspiring but also acoustically optimized and sustainably built. We serve a diverse range of sectors including offices, commercial spaces, education, hospitality, residential, delivering tailored solutions that improve acoustic comfort, wellbeing, and productivity. Our acoustic panels are made from recycled & recyclable PET felt, reflecting our commitment to circular economy principles and environmentally responsible production.

We proudly showcase our expanding product range; each item is a testament to our commitment to certified excellence in high quality acoustic solutions. With every new development, we aim to add value to the industry and enrich spaces with the perfect harmony of form and function.

Introducing Pluffy

Our New Invention in Acoustic Raw Material & Design

Acoustera introduces its most recent product portfolio made with Pluffy, an innovation that provides a more balanced & wider range frequency sound absorption.

Pluffy comes with an acoustic performance certified as "A-Class" offering a sound absorption level above industry standards.

With an enhancing molding technology, Pluffy products are flexible, tactile & versatile offering both resilient & sleek design.

Pluffy products offer highly sustainable design solutions, made from recycled and recyclable PET Felt, without compromising from design & quality.

Sustainability

Is At The Core of What We Do

Enhancing Well-being Through Acoustics

Our acoustic solutions transform interior spaces into calm, comfortable environments by reducing noise, echo, and distractions. From offices and schools to hospitals and public venues, our panels improve speech clarity, support focus, and elevate everyday well-being.

Healthier Indoor Living

We prioritise materials that are safe for people and the spaces they inhabit. Our low-emission products, supported by VOC certifications, contribute to healthier indoor air quality and align with globally recognised green building standards including LEED, BREEAM, WELL, and DGNB.

Responsible Materials, Thoughtfully Made

Crafted from 100% PET felt, our products combine performance with responsibility. Our Inherent and Composite ranges are completely chemical-free, while our Color-It products are sourced from partners who meet high environmental standards and hold OEKO-TEX certifications.

Turning Waste into Value

We transform recycled plastics, often post-consumer bottles, into high-performance acoustic solutions. By giving waste a second life, we reduce landfill impact and minimise the need for virgin materials, supporting a more circular future.

Built to Last, Designed to Perform

Our PET felt solutions are durable, resistant to moisture, mold, and wear, and designed for long-term performance with minimal maintenance. Lightweight by design, they also reduce transport emissions, simplify installation, and lower overall environmental impact compared to traditional materials.

Smarter Design for Longer Life

Our modular systems allow individual components to be replaced, extending product lifespan and reducing waste because sustainability starts with making products that last.

Pushing Circular Innovation Forward

We continuously invest in R&D to reduce, reuse, recycle, and repurpose materials. From minimising production waste to developing closed-loop recycling systems and future take-back programs, we are working toward a fully circular model. Today, our PET Felt contains 60% recycled content with a clear ambition to reach 100% without compromising quality.

Stronger Together

Sustainability is a shared journey. We collaborate closely with our stakeholders and partners to drive better practices across our value chain, ensuring lasting impact beyond our products.

Ethical and Responsible Supply Chain

We work exclusively with suppliers who meet strict environmental and social standards. Every partner commits to our Supplier Code of Conduct.

Driving Impact Aligned with Global Goals

Our solutions actively contribute to the United Nations Sustainable Development Goals, including responsible consumption, sustainable cities, good health and well-being, industry innovation, and climate action.

Certified Excellence

Our excellence is proven through rigorous testing and certification.

Acoustera products have certifications for maximum safety, including fire resistance, thermal insulation, antibacterial properties, being emission-free, containing no chemicals, and light fastness.

99.9% Antibacterial

ACOUSTERA

Plaid, Ridge & Bold

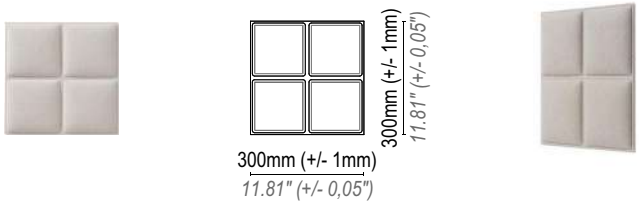

Holistic Aesthetic Appeal

The simple yet cohesive geometry of the Plaid, Ridge, and Bold models allows for versatile use as focal points or backdrops in architectural solutions.

This coordinated grouping enhances holistic aesthetic appeal, optimizing both visual and user experiences to create sound absorbing and visually appealing spaces.

Moon, Saturn & Venus

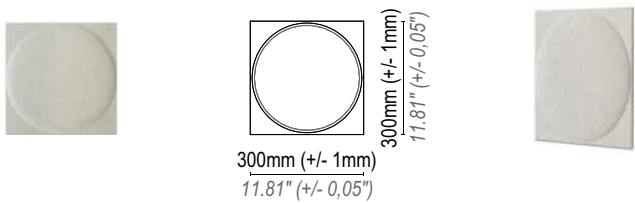

Celestial Harmonious Design

Inspired by the cosmos, our circular acoustic collection—featuring the Moon, Saturn, and Venus model brings perfect balance to modern spaces. Drawing from planetary geometries, these design-forward panels work together to optimize sound absorption while elevating the visual landscape. The result is an immersive, harmonious environment that looks as beautifully as it sounds.

Dynamism and Simplicity

‘Cross’ features a versatile diagonal line pattern that enables creative installations through simple 90-degree rotations, allowing you to refresh aesthetics without additional patterns.

This functionality not only enhances visual appeal but also offers limitless customization while ensuring consistent acoustic performance.

Hex-One

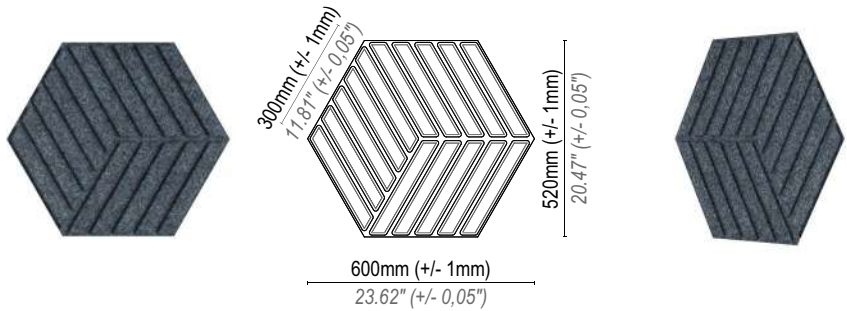

Visual Depth & Acoustics

The unique hexagonal designs allow for versatile configurations and tessellation, creating a stunning visual impact while effectively managing sound.

These panels create a striking three-dimensional effect that adds a dynamic and engaging element to both commercial and residential spaces.

Beyond their aesthetic appeal, they effectively manage sound, enhancing acoustic comfort while transforming interiors into visually captivating environments.

ACOUSTIC PERFORMANCE

Rhythmic interplay of circular forms

Designed through the rhythmic interplay of circular forms and linear lines, Lolly-Pop offers structural dynamism for interior design solutions.

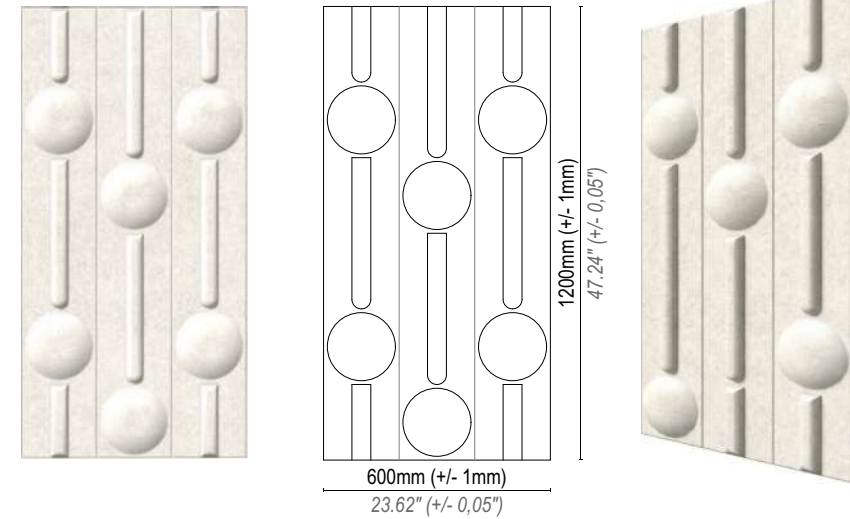

Engineered for versatility, Lolly-Pop panels can be applied horizontally or vertically to create continuous, dynamic patterns that breathe energy into static surfaces.

This synthesis of form and high-performance sound absorption establishes a sophisticated architectural backdrop while enhancing spatial comfort.

ACOUSTERA

Woody Felt

Transforming PET into Wood-Like Elegance

Our innovative 'Woody-Felt' uses eco-friendly printing on recycled PET felt to mimic wood without cutting trees. This sustainable approach extends wood-like aesthetics to curved edges, achieving a seamless and environmentally responsible design.

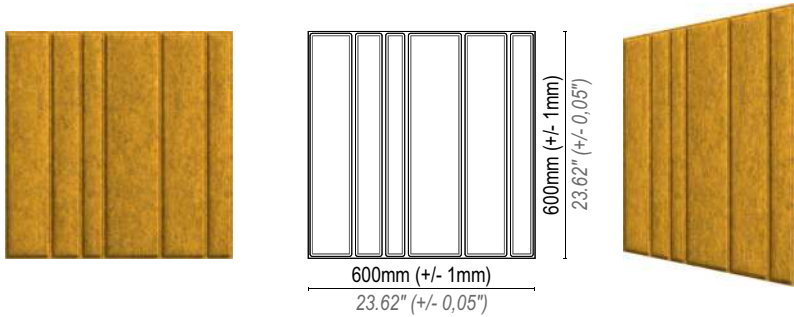

ACOUSTERA

Striped

A modular system of three distinct scales designed for infinite architectural expression.

Striped Small Sound-Absorbing Ceiling & Wall Panel
600mm x 600mm x 15mm

The Ultimate Fusion of Acoustic Harmony & Modular Lighting

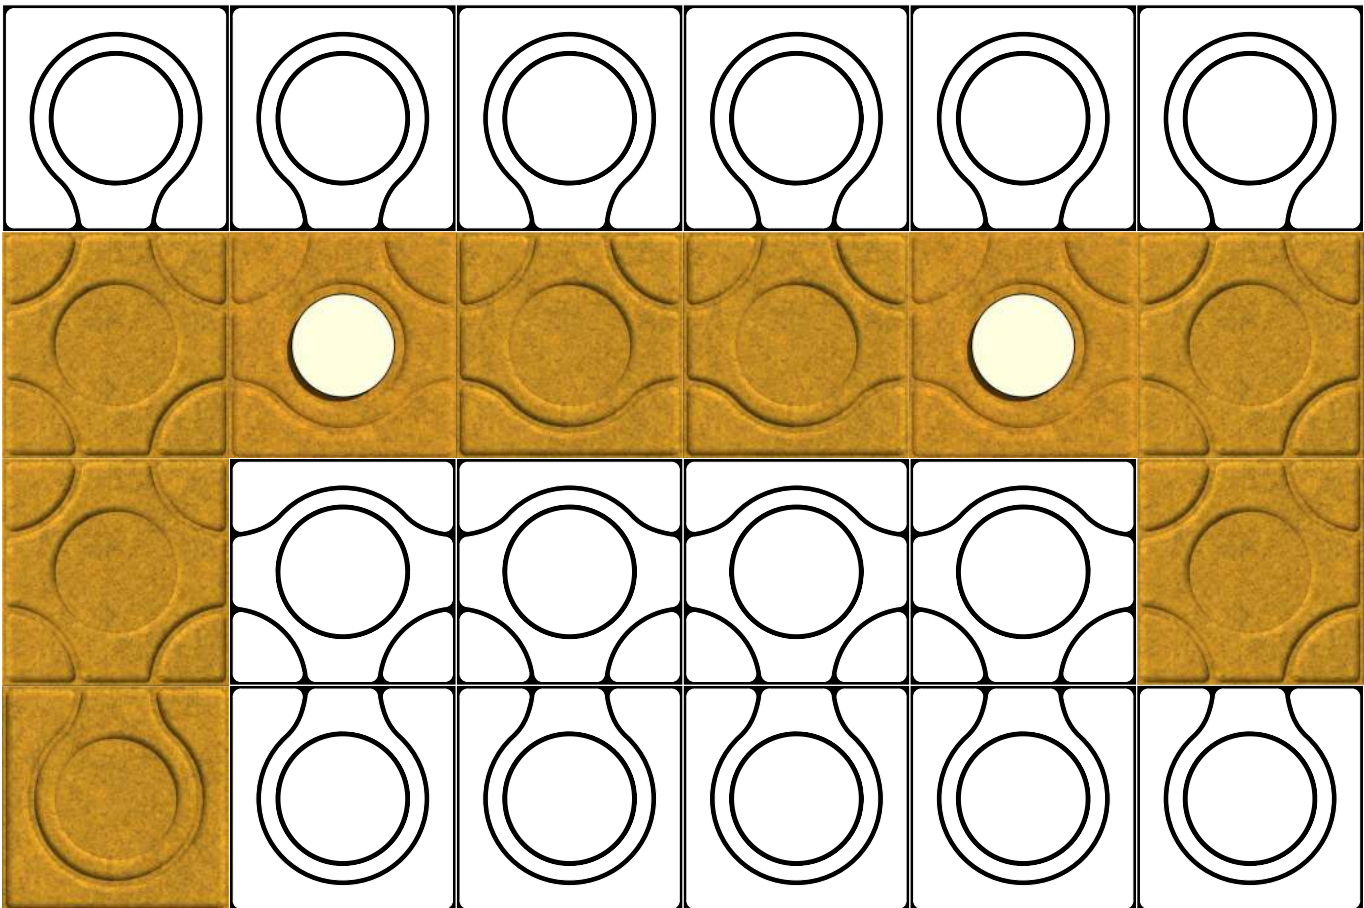

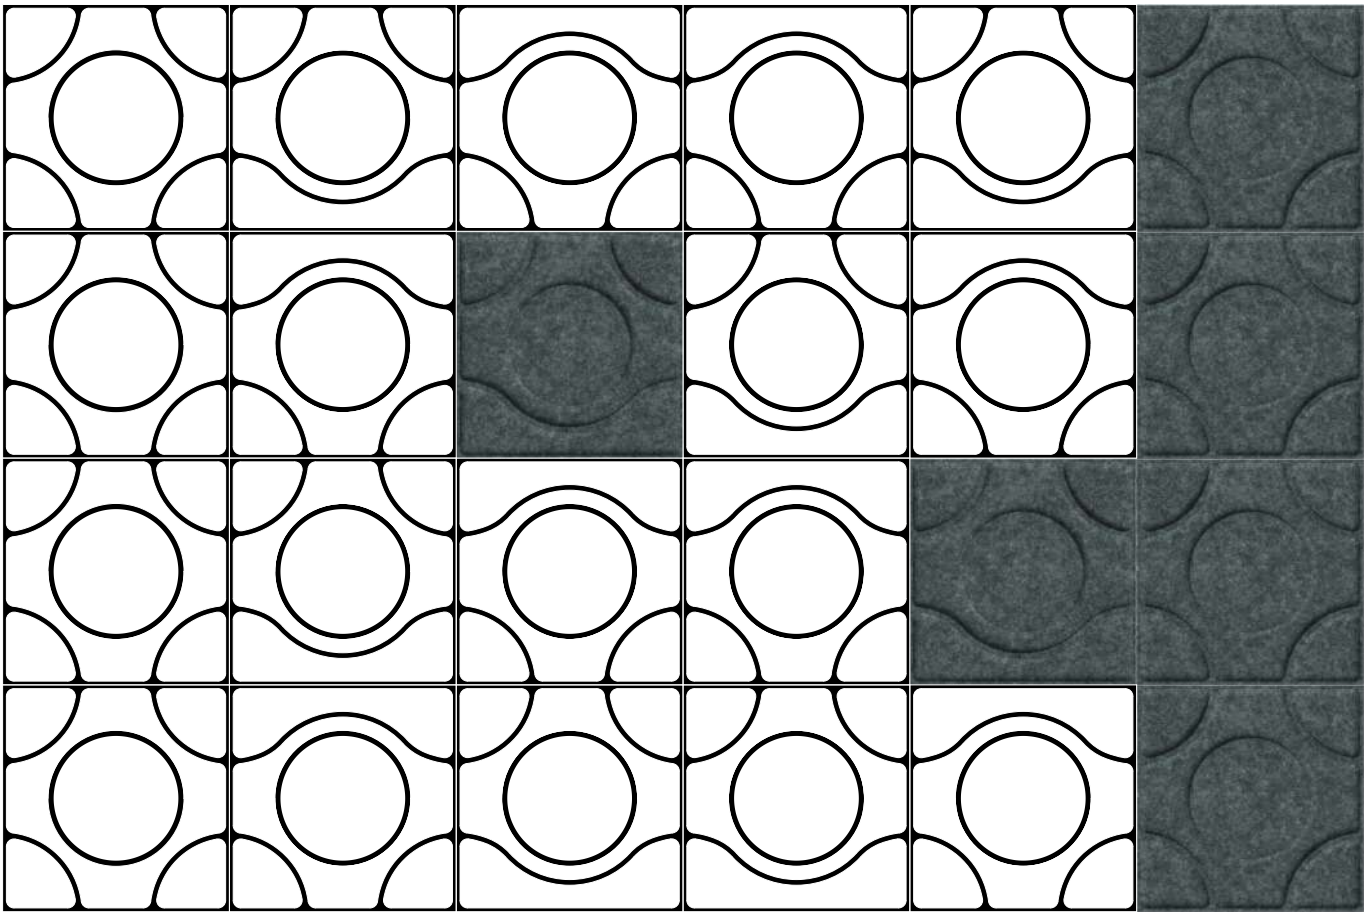

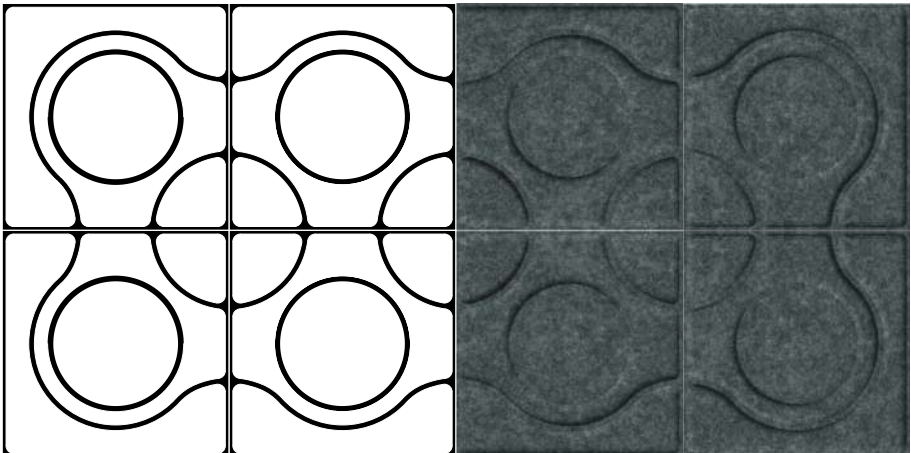

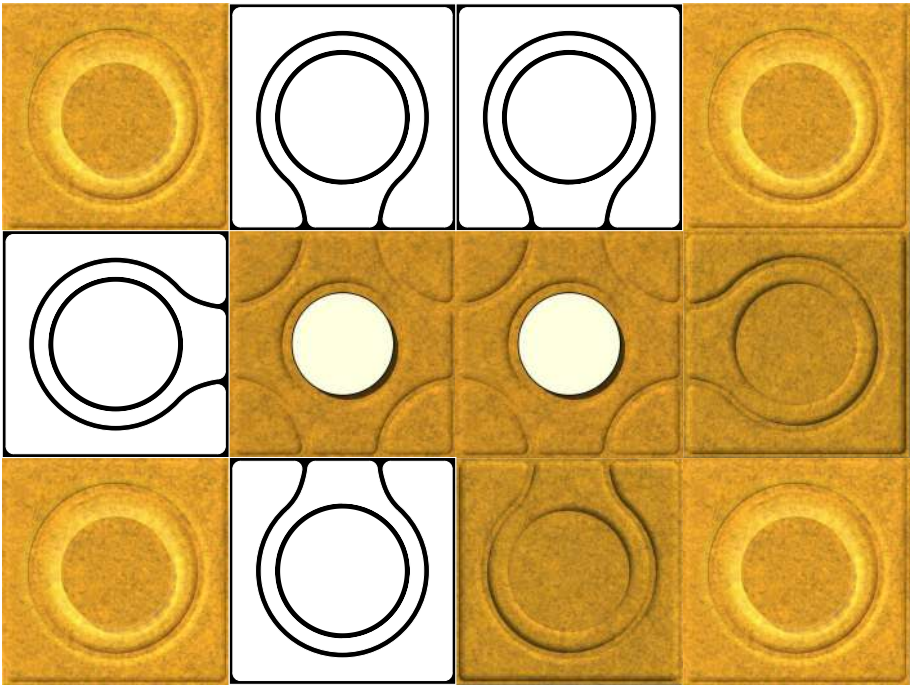

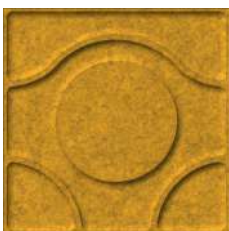

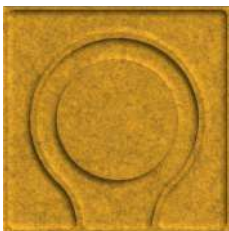

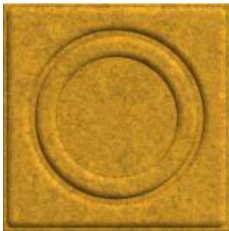

Introducing Rody

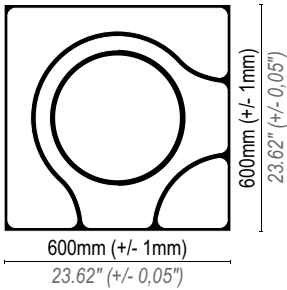

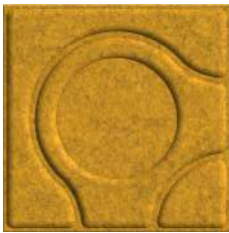

A revolutionary modular panel system redefining the boundaries of interior architecture.

Featuring six distinct yet perfectly compatible designs, Rody offers a versatile option for vast creativity and configuration possibilities.

Rody offers solutions to completely transform walls and ceilings, combining superior acoustic performance with advanced lighting technology.

The fully customizable Rody acoustic panels go beyond balancing sound and comfort; they are engineered to provide a seamless, integrated lighting solution with the option for direct or indirect lighting on every individual module.

ACOUSTIC PERFORMANCE

ACOUSTERA

Flame

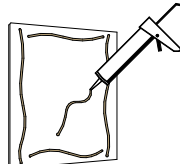

Make a striking architectural statement!

Flame is a sculptural, 3D-molded PET felt acoustic panel engineered for sweeping, large-scale applications. It pairs ultimate sound absorption with a flawless aesthetic, utilizing perfectly concealed joints for a truly seamless finish.

Beyond premium acoustics, Flame's distinctive linear contours allow for the direct integration of architectural lighting, merging sound control and dynamic illumination into one bold, continuous surface that elevates modern interiors.

ACOUSTERA

Hoop-In

Our Lay-In panels seamlessly integrate into your existing T15 or T24 suspended ceiling grid systems.

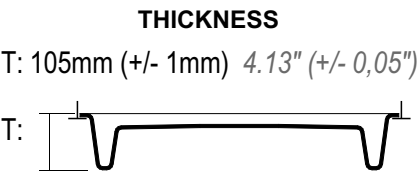

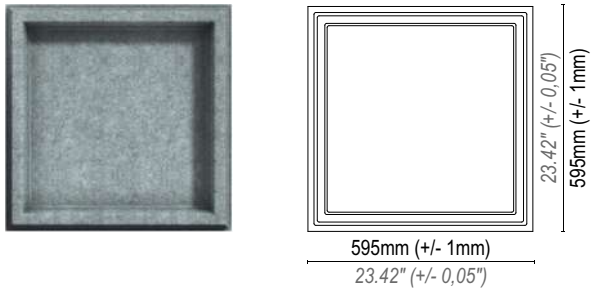

With no need for specialized installation, these panels offer a simple way to introduce design innovation to your familiar space while addressing reverberation issues.

Alternatively, you can start your projects from scratch using this universally compatible suspended ceiling carrier system, which is both easy to use and cost-effective.

Hoop-In Sound-Absorbing Ceiling & Wall Panel
595mm x 595mm x 105mm

Product Code / Description	Box Qty / m²	Felt Color Palettes		Recomm. Mounting
HPN-20LYN - Inherent (Panel Only)	12 / 4.248 m²			Existing T-Grid T15 or T24
HPN-20LYS - Solid Core (Panel Only)	12 / 4.248 m²			Step 1: Positioning Step 2: Mounting

APPLICATION
3D molded ceiling panel
Suitable for "T15" & "T24",
suspended ceiling carrier systems
Only panels are included

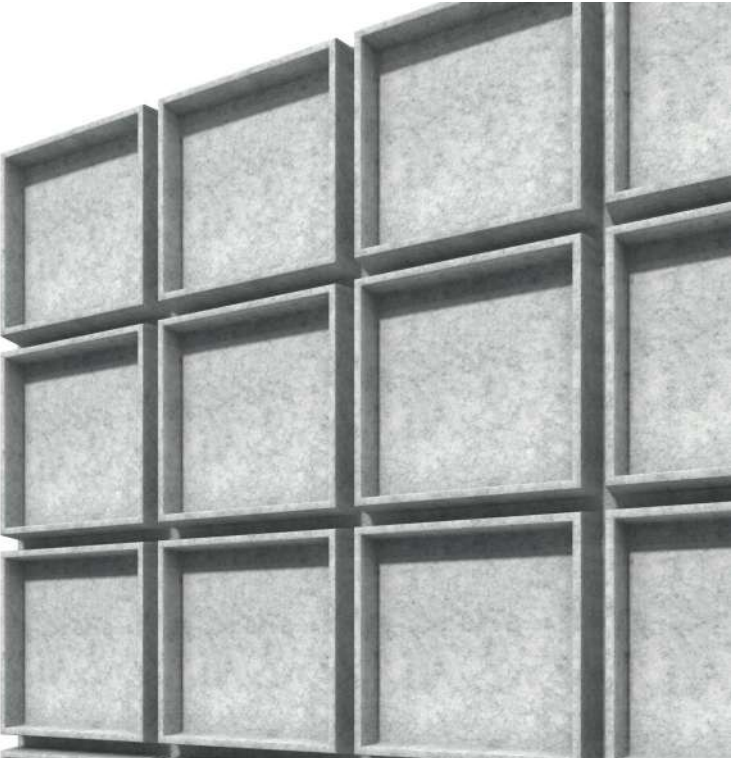

MATERIAL
Mechanical needled punch industrial felt.
100% PET up to 60% Recycled content & Recyclable

ACOUSTERA Sound Blades

Cutting Through Noise

‘Blade’ sound baffles are designed to provide superior acoustic management by effectively reducing noise and reverberation in large, open spaces.

Suspended vertically from the ceiling, these baffles are perfect for use in areas such as offices, auditoriums, and conference rooms.

With easy installation and customizable options, Blade sound baffles offer a practical and stylish solution for creating quieter, more comfortable spaces.

ACOUSTERA Blade Dividers

Blade Divider Modular Sound-Absorbing Divider

Sculpting Privacy in Open Spaces

The Blade Divider series serves as a sophisticated architectural solution for defining zones without compromising the flow of an open environment.

Engineered from 100% polyester industrial high-density PET felt, these acoustic fins are precision crafted to "slice" through echoing sound waves, effectively mitigating reverberation while providing a delicate balance of visual privacy.

By leveraging the modular height system available in 60cm, 90cm, 120cm, 150cm & 180cm increment you can effortlessly achieve perfect vertical alignment and create a uniform horizon across any interior space.

Whether these dividers are suspended as a ceiling-to-floor fixed installation to create a permanent, grounded architectural statement, or utilized with adjustable cable suspension for agile workspace configurations, they provide unparalleled creative freedom.

Ultimately, Blade Dividers empower you to tailor the specific privacy and acoustic needs of any space, ensuring modular configuration feels intentional, secure, & architecturally sound.

Modular Scalability

The Blade Divider series is engineered with a modular height system available in 60cm, 90cm, 120cm, 150cm & 180cm increments designed for perfect vertical alignment.

This mathematical precision allows for seamless creative freedom; you can effortlessly "stack" or align different units to achieve a uniform horizon.

Whether pairing two 90cm blades to match a 180cm statement piece, or combining 120cm and 60cm units to create a staggered rhythmic flow, the dimensions are calculated to ensure every configuration feels intentional and architecturally sound.

Scalable System

Modular design for vertical configuration at any height.

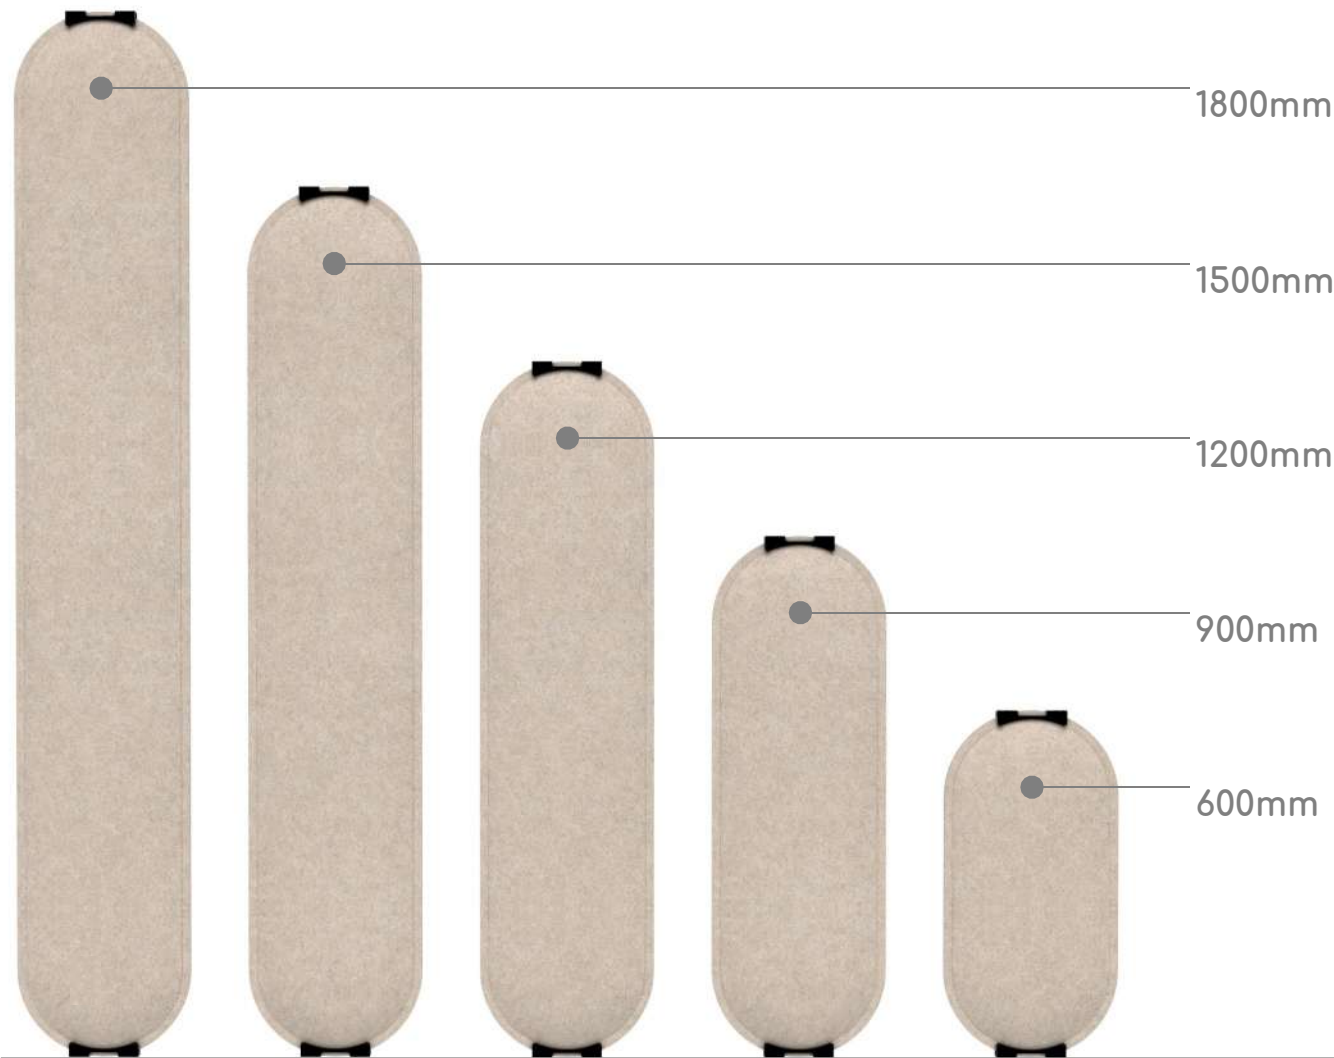

Secure Connections

Standardized connection points ensure seamless stacking.

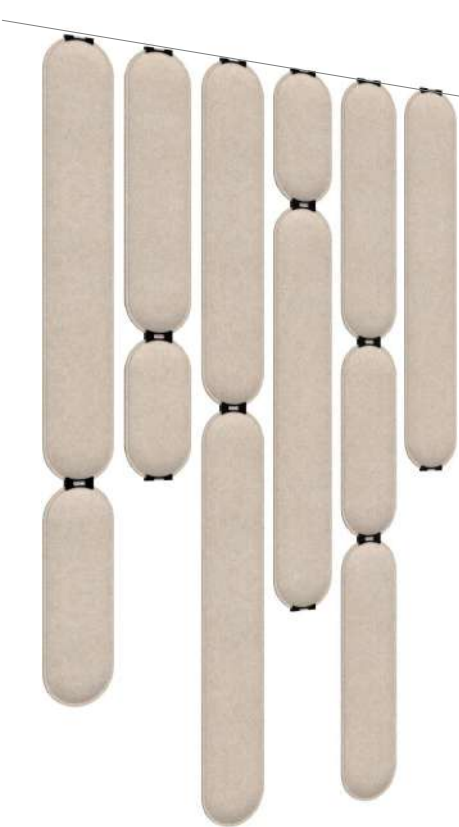

Fixed Installations

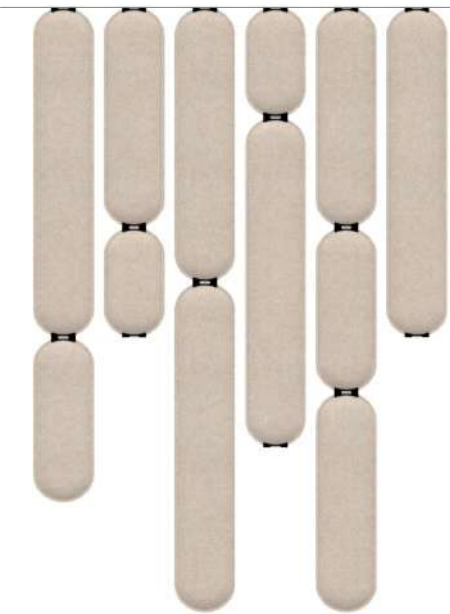

Optional ceiling mounts for permanent, stable placement.

Ceiling-Mounted

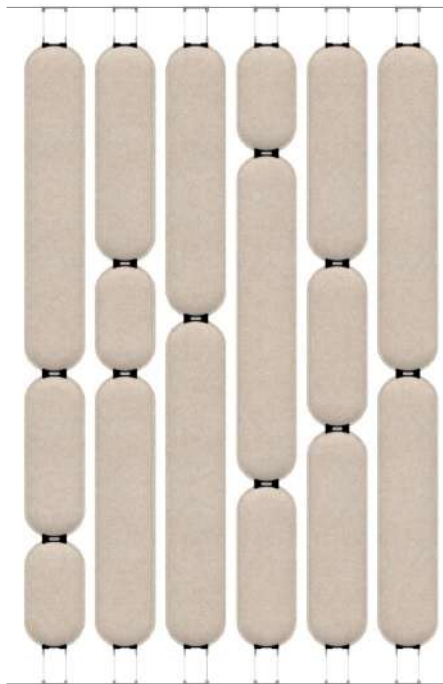

Fixed Metal Adapter
Designed for direct ceiling attachment. Provides a clean, minimalist "floating" look for standard ceiling heights. Ensures a permanent, sturdy vertical position.

Floor-to-Ceiling with Wires

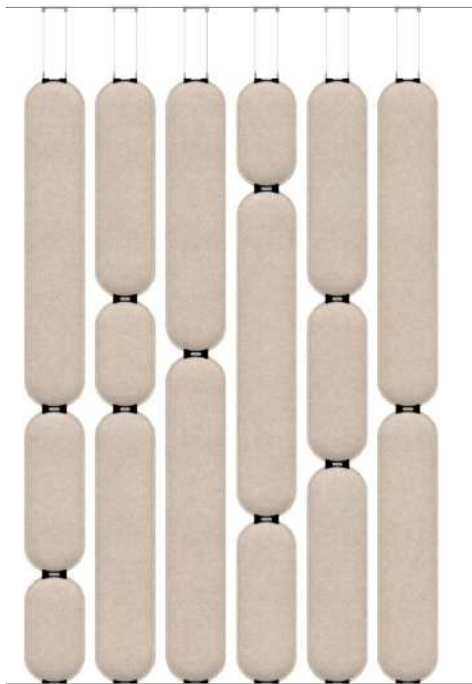

Adjustable Cable System
Utilizes high-tension stainless steel wires. Perfect for high ceilings or "open-sky" industrial spaces. Allows for precise height adjustment to align with existing architectural lines.

Ceiling with Wires Fixed to the Floor

Tethered Grounding
Floor-to-ceiling mounting that prevents swaying in high-traffic areas. This creates an architectural "column" effect, making the divider feel like an integrated part of the building's structure.

Blade Divider Module Small

Sound-Absorbing Divider

300mm x 900mm x 20mm

Product Code / Description	Custom Box	Felt Color Palettes		Metal Adapters Fixed
BLS-30HDN - Inherent (With Fixtures)	1			
BLS-30HDC - Color-IT (With Fixtures)	1			

APPLICATION
Wall & Ceiling - Indoor use only

MATERIAL
Mechanical needled punch industrial felt.
100% PET up to 60%
Recycled content &
Recyclable

Smooth Surface - Impact Resistance - Flexible

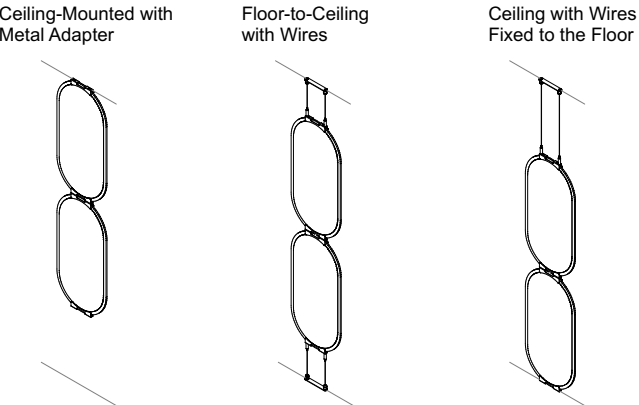

FIRE RATING
A Class (ASTM E84) - B s1 d0 (EN 13501-1)

WEIGHT
1 tile: 565 gr. +/- 10% tolerance
1 tile: 1.24 lbs with +/- 10% tolerance

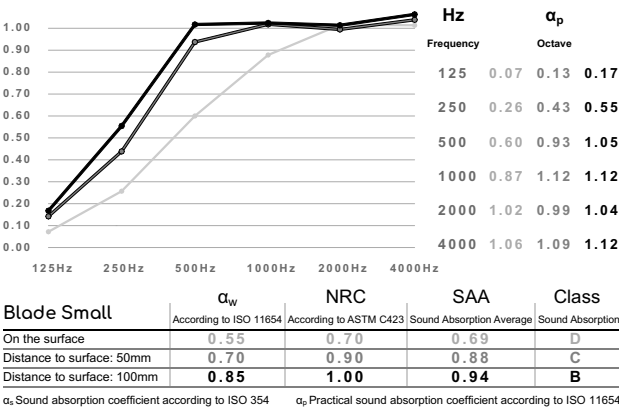

THICKNESS

Max. 20mm (+/- 2mm) - 0.78" (+/-0.08")
Min. 5mm (+/- 2mm) - 0.19" (+/-0.08")

Blade Lighting

The Blade Series: Precision in Light and Sound

The Blade Series represents the cutting edge of functional aesthetics, seamlessly merging high-performance LED technology with Acoustera's signature 100% polyester industrial felt.

Designed as a modular acoustic lighting solution, the Blade features a slim, linear profile that "slices" through ambient noise while providing targeted, high-quality illumination.

Available in three distinct scales this series offers architects and designers the flexibility to create rhythmic overhead configurations or singular statement pieces.

Whether installed in minimalist offices or expansive commercial halls, the Blade Series delivers a dual-sensory experience: visual clarity and acoustic serenity.

Sound Clouds Lighting

Sound Clouds Lightings Oblong & Frame combine our signature Class-A acoustic performance with premium LED lighting.

Offering superior noise reduction and brilliant illumination in a single, dual-purpose design, these versatile clouds are ideal for ceiling applications.

Enhance your sound quality and brighten your space while adding a striking, modern aesthetic.

ACOUSTIC PERFORMANCE

The graph plots sound absorption coefficient (α_p) on the y-axis (0.00 to 1.20) against frequency in Hz on the x-axis (63 Hz to 4000 Hz). Three curves are shown, representing different product configurations. The curves show a sharp increase in absorption starting around 125 Hz, reaching a plateau of approximately 1.00 at 500 Hz and above.

Frequency (Hz)	α _p (Octave)	α _p (0.07)	α _p (0.28)	α _p (0.82)	α _p (1.20)	α _p (1.19)	α _p (1.16)	α _p (1.18)	α _p (1.15)
63	0.07	0.07	0.28

Dividers on Legs & Casters

Privacy in Quieter spaces

You can transform your spatial planning with our high-performance sound-absorbing room dividers.

These innovative solutions not only enhance acoustic comfort but also facilitate the creation of personal areas, allowing you to design private spaces tailored to your needs.

Experience a new level of functionality and tranquility in your environment.

Colors & Textures

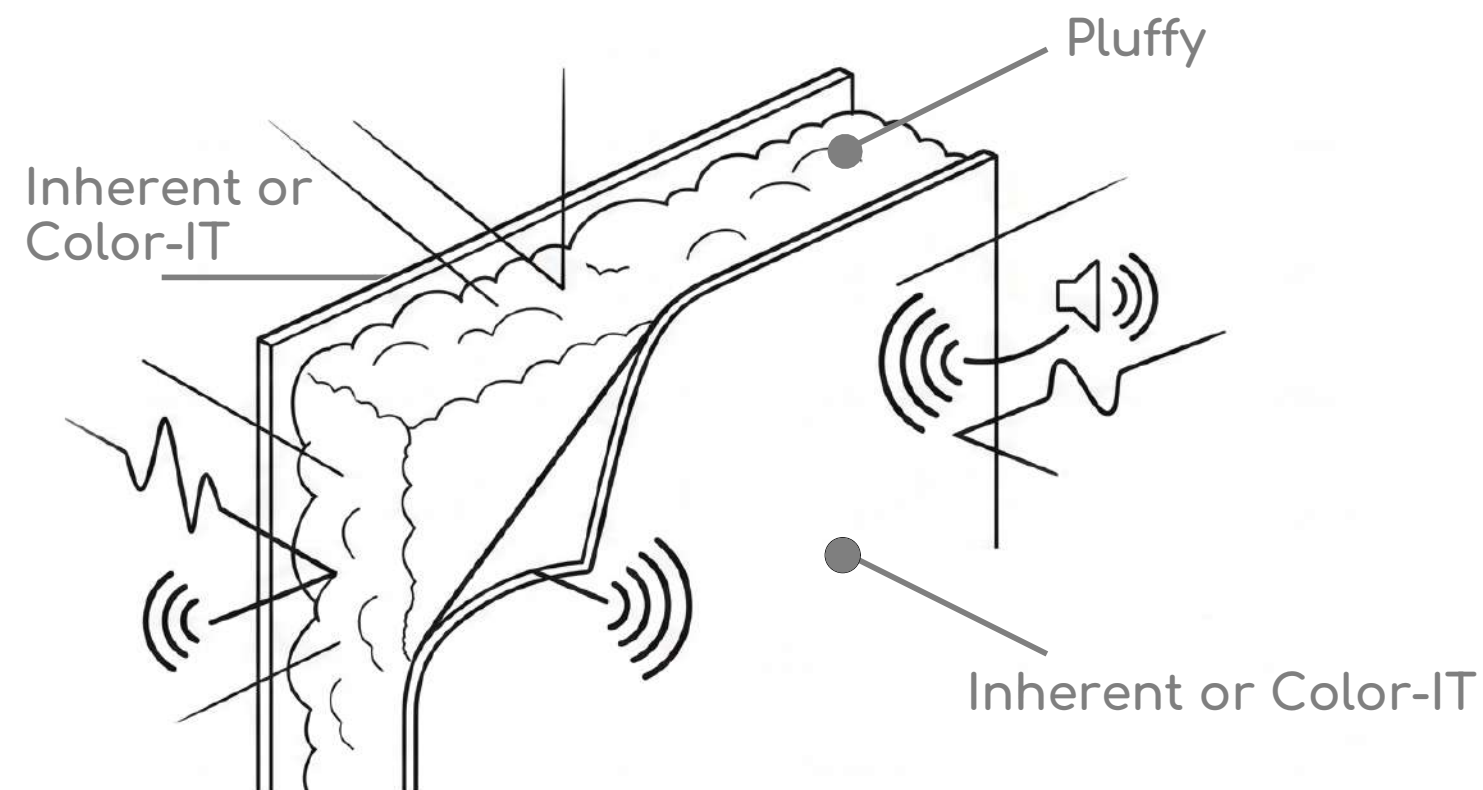

At Acoustera, we believe that superior acoustic performance should never come at the expense of aesthetic vision. Our felt collections are engineered to harmonize high-frequency sound absorption with a limitless palette of colors and textures.

To help you select the perfect finish for your project, we offer three distinct production techniques, each utilizing our curated felt palettes:

Pluffy: The New Standard in Sound Absorption

Pluffy represents our latest innovation in acoustic engineering. This specialized raw material is designed specifically for maximum sound absorption. By laminating our felt palettes onto the Pluffy core, we create a composite material that captures a wider range of frequencies, resulting in unparalleled acoustic comfort.

3D Forming: Structural Elegance

Our 3D-formed products bring depth and geometry to a space. These architectural elements are heat-pressed to maintain rigid, beautiful shapes while providing essential sound diffusion.

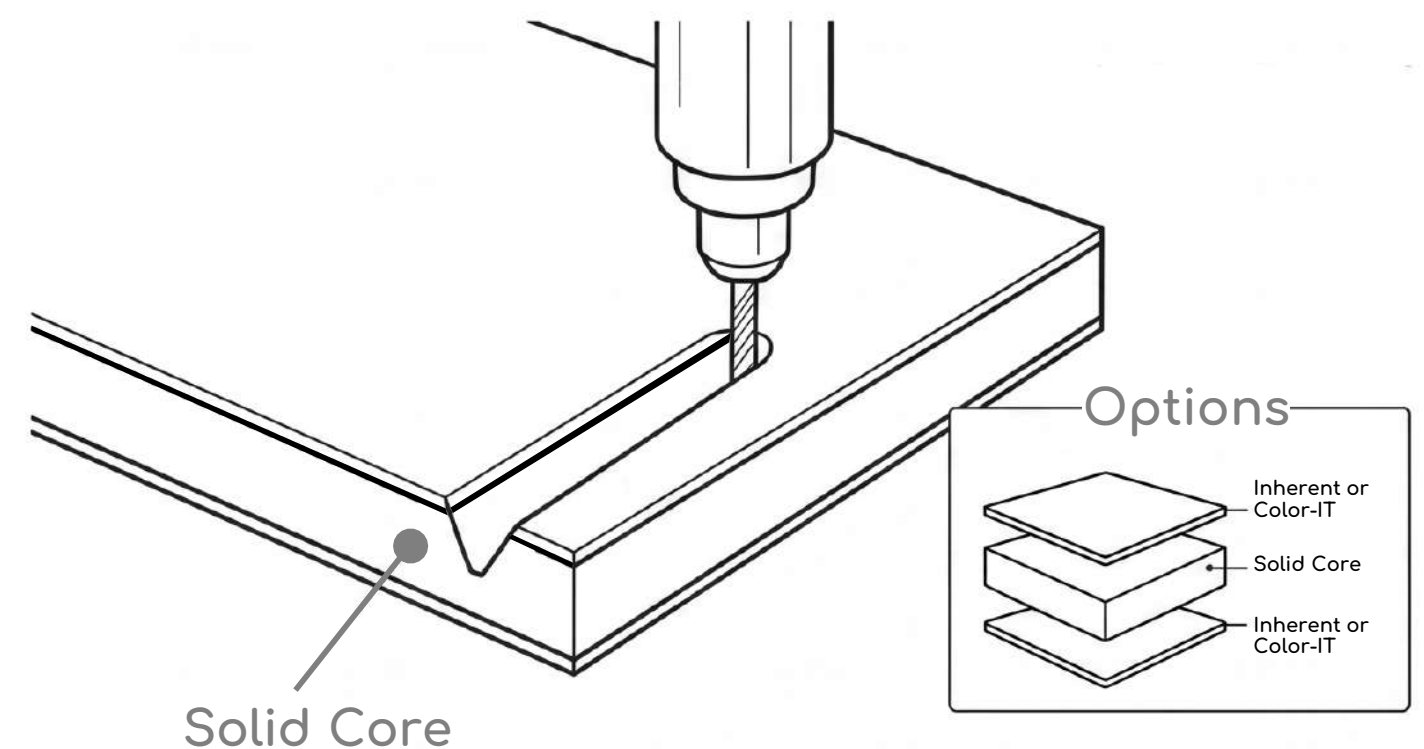

Baseliner Series: The Foundation of Design

Baseliner is our versatile felt sheet collection. This series is the ultimate canvas for architects and designers.

Custom Lamination: Baseliner sheets feature a Solid Core base that can be laminated on one or both sides with Color-IT or Inherent felts.

CNC V-Cut Precision: By laminating different colors, we can perform CNC V-cuts on the surface to reveal the core color beneath, creating striking multi-colored linear patterns and custom branding.

"Expanded Color Library: Refer to www.acoustera.com for our full range and latest updates, including the newest seasonal additions and technical specifications. Minor batch variations may occur. Acoustera reserves the right to update, modify or discontinue any finish without prior notice.

ACOUSTERA guarantees to its customers that its products are free from material, production, and assembly defects.

ACOUSTERA A.Ş. declares that ACOUSTERA branded products carry a warranty period of 10 years, provided they are used indoors. This warranty period is valid for 10 years from the date of delivery within the conditions specified.

Warranty Coverage:

This warranty covers defects in material, production, and assembly that arise during the warranty period under normal use and service. Please note that this warranty applies specifically to the felt material used in our products.

- This warranty does not cover damages caused by the following conditions:
- Damages occurring due to customer fault or misuse.
 - Vandalism.
 - Plumbing infrastructure and external assembly defects.
 - Defects arising from unauthorized installation by persons lacking sufficient technical expertise or professional equipment.
 - Defects that may arise from electrical, mechanical & sanitary installations.
 - Interventions or repairs other than those specified in the enclosed maintenance instructions.
 - Any defects caused by non-manufacturing errors are outside the scope of this warranty.

How to make a claim:

- Notification: Contact our support team via info@acoustera.com within thirty (30) days of discovering the defect.
- Required Documentation: Please provide a copy of your original invoice or proof of purchase, along with the date of delivery.
- Evidence: Include a detailed description of the issue and clear photographs showing the defect.
- Inspection: ACOUSTERA A.Ş. reserves the right to inspect the product on-site or request that the product be returned for evaluation before a remedy is provided.

Upon validation of the claim, ACOUSTERA A.Ş. will, at its discretion, either repair the defective product or provide a replacement.

Maintenance Guidelines:

- To prevent soil build-up, vacuum panels gently and regularly using a soft upholstery attachment to remove airborne dust and lint.
- Do not wash.
- Do not bleach.
- Do not iron.
- Do not tumble dry.
- Do not dry clean.

Regular cleaning:

- Gently vacuum with a soft upholstery attachment.
- For in door use only, avoid direct sunlight.
- Professional cleaning is recommended.

Spot cleaning:

- Remove stains immediately.
- Do not rub or brush excessively.
- Use only upholstery detergent for cleaning.
- Gently clean with a damp cloth using warm water.
